

org.zerock.controller.User
ChallengeController.joinChallenge

org.zerock.controller.User
ChallengeController.saveUserChallenge

org.zerock.service.UserChallenge
Service.saveUserChallenge

```
graph LR; A["org.zerock.controller.UserChallengeController.joinChallenge"] --> C["org.zerock.service.UserChallengeService.saveUserChallenge"]; B["org.zerock.controller.UserChallengeController.saveUserChallenge"] --> C;
```

The diagram illustrates a mapping from two controller methods to a single service method. Two light gray boxes on the left represent controller methods: 'org.zerock.controller.UserChallengeController.joinChallenge' and 'org.zerock.controller.UserChallengeController.saveUserChallenge'. Two blue arrows point from these boxes to a single dark gray box on the right, which represents the service method 'org.zerock.service.UserChallengeService.saveUserChallenge'.
